HALF EAGLES

The following series of Half Eagles, Quarter Eagles and Three dollar pieces, in the most part formed the collection of Thomas Aspinwall, Esq., of Manchester, N. H., recently the property of William J. Jenks of Philadelphia. A little over are the most complete line ever offered for public competition, and an opportunity to buy different collectors which may not occur again for years, of making valuable additions to their cabinets. A great many of the pieces are extremely rare, as for sale and increased interest given to the collecting of gold coin demonstrate, and should a few new buyers come into the field they will find it utterly impossible for them to obtain the pieces they want.

The following are with a few of the rarer and especially interesting numbers on account of their rarity: Half eagles, 1795, large eagle, 1796, 1797, large and small eagles, 1805, 1821, 1825, 1829, 1831, old and new types, 1834, 1835 and 1837, quarter eagles, 1796, 1797, 1798, 1806, 1808, 1821, old type. The latter coins in fine to proof condition, are seldom offered for sale. In three dollar pieces, 1855, 1857, 1873 and 1878 in quantities, 1865, 1866, and 1875 are most rare and desirable.

2	2.5	324	1795 Very close date. Reverse, large wreath to eagle's beak. A rare variety in beautiful, nearly proof condition. Very rare.
		325	1795 Wide date. Reverse, small wreath to eagle's beak. Very fine. Rare.
3	5	326	1795 The excessively rare type with large heraldic eagle on reverse. This piece is one of the rarest of American coins, and is to be found in but few collections; brought $60.50 in McCoy sale, when there were few collectors of gold. It is in extremely fine condition and most desirable for any cabinet. Brought $70 in Seavy sale, 1864.
2		327	1796 Struck over 1795. A beautiful half eagle in barely circulated condition, and excessively rare so fine.
		328	1797 Obverse, 16 stars. Reverse, small eagle. In nearly proof condition. The attention of collectors is especially directed to the variety of this and the following piece. Judging by the infrequency of their appearance in sales, they would seem to equal in rarity the 1804 dollar.
		329	1797 Struck in 1795. Obverse, 15 stars. Reverse, large eagle. In fine condition and rarer even than the preceding.
		330	1798 Small date. Strictly uncirculated. Very rare.
		331	1799 Extremely fine. Much rarer than the eagle of this date.
		332	1800 Brilliant proof. Exceedingly rare.
		333	1802 Over 1. Date distant from bust. Uncirculated. Very handsome piece. Scarce.
		334	1802 Over 1. Same condition. 2 of date touches bust.
		335	1803 Over 2. Beautiful proof impression. Very rare.
		336	1804 Small 8. Another proof finer and rarer than the last.
		337	1804 Large 8. Uncirculated. Scarce.
		338	1805 Uncirculated. Scarce.
		339	1806 Blunt 6. Uncirculated. Scarce.
		340	1806 Pointed 6. Scarce type. Very fine.
		341	1807 Head to right. Extremely fine. Scarce type.
		342	1807 Head to left. Uncirculated.
		343	1808 A sharp, strictly uncirculated piece.
		344	1808 A beautiful impression. In perfect condition.

345 1810 Small date. Small 5 on reverse. Proof. Extremely rare.

346 1810 Large date. Large 5 on reverse. Very fine. Scarce.

347 1811 A beautiful, uncirculated impression.

348 1812 Same condition as the last. Scarce.

349 1813 Uncirculated. A beauty. Very scarce.

350 1814 Uncirculated. This date is becoming very rare.

351 1815 The rarest piece in the United States series, and to be found but in two or three collections. The cabinet of the U. S. Mint although containing a beautiful line of gold, lacks this date. This piece was submitted to the Assayer of the Mint, Mr. Du Bois, who declared it to be of good gold and of the proper weight, but owing to it being alloyed with copper its specific gravity is a trifle below the standard. A small crack in the edge prevents its ringing and induced me to present it at the Mint to ascertain its genuineness. It has served its purpose as a coin by having been circulated, a fact which might enhance its value to some collectors. It is, however, in very fair condition, and on account of its extreme rarity most desirable for any cabinet.

352 1818 Star to right very near head. Uncirculated. Very scarce.

353 1818 Star distant. Variety on reverse. Uncirculated. Very scarce.

354 1819 A beautiful impression. Uncirculated. With proof surface and extremely rare and desirable.

355 1820 Strictly uncirculated. Deep milling and extremely rare.

356 1821 Uncirculated. Proof surface slightly haymarked in field. Excessively rare.

357 1823 In extremely fine condition and very rare.

358 1824 In very good condition and one of the rarest of the series. This and the 1815 half eagle are the only two dates not in the Mint cabinet, and I believe this piece is almost as rare as the 1815.

359 1825 Beautiful, uncirculated impression. Obverse has proof surface but slightly haymarked in field. Very rare.

360 1826 Extremely fine. Proof surface and a very difficult date to obtain in any condition.

361 1827 A sharp extremely fine impression. Exceedingly rare and desirable.

362 1828 Next in rarity to the 1815. This piece is of great rarity, and being in a beautiful state of preservation, it is one of the most desirable of the Mint series.

363 1829 Old type. This piece I believe is as rare as the preceding. It is perfectly uncirculated, with broad, deep milling, and, no doubt, the finest of the two or three ever offered for public or private competition.

364 1829 New type. This piece is a size smaller than the last described. The stars, date, and lettering on reverse being also smaller. I do not know that collectors are generally aware of its existence, as I believe that never but one has made its appearance in a sale. Strictly uncirculated and of the highest rarity and importance, showing, as it does, the beginning of the new type.

395 1830 Strictly uncirculated, and one of the rarest of the series.

396 1831 Barely circulated. Rarer than the last described.

397 1832 Uncirculated. Extremely rare.

398 1833 Nearly as fine. Extremely rare.

369 1834 Old type. A sharp impression with proof surface. Extremely rare.

399 1862 Brilliant proof. Exceedingly rare.

400 1863 Brilliant proof. I am informed that in this year but 30 quarter eagles, and about the same number of half eagles and three dollar gold pieces were struck. Hence they must be of exceeding rarity.
